Instructions for Use

1. This mask must be used as a complement to the recommended protection and hygiene measures, and to the rules of social distance, fundamental for the control of Covid-19;
2. Wash your hands with soap and water or clean it with an alcohol-based solution (a);
3. Put the mask with the inner face towards the face (b);
4. Adjust the mask to cover the nose, mouth and chin (c);
5. Adjust the metallic filament to the nose (c);
6. Wash the mask after each use according to the instruction (d);
7. Wait for the mask to dry completely after washing it before using it;
8. Do not use for long periods. Preferably up to 4 hours;
9. Remove by elastic bands, fold in half with the outside facing inwards and insulate until washed;

MAXIMUM UP TO 5 WASHES

The mask should be used very dry after washing, we suggest the use of neutral detergent.

The wet/damp mask decreases the protection of the mask. The mask can only be used by someone else after washing.

If you accidentally get your mask wet, replace it with another one as soon as possible. The wet mask must be washed before being reused.

At the end of the recommended daily use or whenever you return home, the mask must be washed before being reused.
